FULL-STACK DEVELOPER

Full-Stack Developer with practical experience building web applications using modern frontend and backend technologies. Proficient in **HTML, SCSS, Tailwind, JavaScript, TypeScript, React, Next.js** and responsive web design. Familiar with backend development using **Node.js, NestJS, Prisma ORM, REST APIs**, and SQL databases.

Skilled in building user-friendly interfaces, implementing application logic, and integrating frontend and backend components. Comfortable with Git, debugging, and following software development best practices. Strong problem-solving skills, attention to detail, and a genuine passion for learning new technologies. **Open to full-time opportunities.**

EXPERIENCE

Freelance Developer — Independent Contract Work — 6 months
Delivered custom programming assignments and technical solutions for university students on a paid, per-project basis.

- Worked independently across varying tech stacks and requirements, often without a fixed specification.
- Managed client communication, scoping, and deadlines end-to-end for each engagement.
- Result: built a solid foundation in independent problem-solving, client communication, and delivering under real deadlines.

SOFT SKILLS

- Self-motivation
- Goal-orientation
- Discipline

HARD SKILLS

Frontend

- JavaScript, TypeScript
- React, Next.js
- Redux Toolkit, RTK Query, TanStack Query
- SCSS, CSS Modules, Tailwind CSS, ShadcnUI Kit
- Zod, React Hook Form
- Responsive, Adaptive Web Design

Backend

- Node.js, NestJS
- REST API
- PostgreSQL, MySQL, MS SQL Server, MongoDB, Cassandra, Redis
- Prisma ORM, Mongoose
- JWT Authentication, DTO Validation
- WebSockets, RabbitMQ
- AWS Services

AI Tools & Skills

- Claude Code, Codex, Antigravity
- MCP (Model Context Protocol) servers, Claude Skills
- OpenAI API, LLM API integration (OpenAI-compatible, Groq)
- Prompt engineering, AI-assisted development workflows
- Speech-to-text and vision models (Whisper)

Tools & Practices

- Git / GitHub
- Docker / Kubernetes

- GitHub Actions (CI/CD)
- Project Deployment
- Debugging & code review basics

PERSONAL PROJECTS

NEXUS.gg — Multi-Game Stats Tracker — GitHub repo | Live demo
Tools: Next.js, NestJS, Tailwind CSS, ShadcnUI, Redis, AWS, GitHub Actions
Gaming platform for tracking player stats, match history, and profiles across multiple video games in one place.

- Built the NestJS backend to aggregate and serve player statistics and match history from multiple game sources.
- Developed a responsive Next.js/Tailwind frontend styled with ShadcnUI for browsing profiles and recent matches.
- Deployed core infrastructure on AWS (S3, RDS) to support scalable data storage and delivery.
- Result: laying the foundation for a unified stats hub that removes the need to check separate apps per game.

Telegram AI Chat Assistant — GitHub repo | Live demo
Tools: NestJS, TypeScript, Telegraf, MongoDB, LLM API (Groq), Whisper, Docker
Telegram bot that drafts replies to incoming messages in the user's own texting style and chosen tone.

- Built the NestJS/Telegraf backend with per-chat sessions, settings and conversation history stored in MongoDB.
- Integrated LLM, Whisper speech-to-text and vision models through an OpenAI-compatible API to handle text, voice and media, with long-term memory of facts extracted from the chat.
- Implemented message batching, draft editing and regeneration, and Telegram Business integration with timed auto-send; containerized with Docker.
- Result: delivered a working AI assistant that learns from the user's edits and can reply on their behalf directly in Telegram.

Personal Portfolio Website — Live demo
Tools: Next.js, SCSS Modules, Adaptive Layout, Vercel
A modern, high-performance personal portfolio designed to showcase professional projects and technical skills.

- Developed a fully adaptive and responsive UI with smooth transitions using SCSS.
- Optimized image loading and performance using Next.js built-in features; deployed to Vercel.
- Result: pixel-perfect, mobile-friendly site with excellent performance scores and cross-device compatibility.

EDUCATION (Open to full-time opportunities)

Lviv Polytechnic National University
Bachelor's Degree in Systems Analysis and Data Science
2024 – 2028 (currently enrolled, expected graduation 2028)

LANGUAGES

- Ukrainian — Native
- English — Upper-Intermediate
